

In 2022 PGP solidified its position as a nationally leading transaction advisor to physician groups by completing more than 12 transactions with private equity in a range of specialty areas

Physician Growth Partners (PGP) concluded 2022 with a very strong month, closing four transactions in December. PGP continued to strengthen its reputation as the leading advisor to specialty physician groups across the country with **more than 12 transactions completed** during 2022 covering several different physician specialties and reaching from coast to coast. Our team deepened its already strong experience in dermatology and eye care, while spending an increasing amount of time advising groups dedicated to behavioral health, dental, gastroenterology, orthopedics, pain management, urology, and women's health – specialties that are starting to consolidate. PGP expects activity within these sectors to continue in 2023 as we work to cement our position as **the go-to provider of transaction advisory services for any physician interested in working with private equity.**
